Why hire me?

Results-driven and people-oriented, I am feeling most comfortable in agile development environments with a focus on personal growth. My life-long passion is the Internet and I love crafting modern intuitive UX for web applications that solve real problems. Beside my regular job as a developer, over the last 8 years I have successfully delivered several freelancing gigs, personal [side-projects](#) and I went to a [dozen hackathons](#) to train exactly those muscles.
